# Fawad Ahmed Mir

fawadmeer000@gmail.com +92 3065297526 Muzaffarabad, AJK LinkedIn Github

## SUMMARY

Ethical Hacker and Penetration Tester with over 2 years of experience in network, host and web application security. Proven track record in reducing vulnerabilities by 95% in application security hardening and leading effective red team operations through practical exploit development and adversary simulation. Skilled in Host, Network & Web Penetration Testing, Threat Intelligence, and Security Automation; known for hands-on expertise in developing custom security tools and mentoring Cybersecurity teams.

## WORK EXPERIENCE

**CEO** – The Eagnibals *Jan 2024 – Present | Remote*

- Founder and CEO of The Eagnibals, a student-led cybersecurity group focused on learning and practicing penetration testing methodologies.
- Developed custom lab environments and challenge scenarios for hands-on training; personally solved and validated labs before release.
- Mentored group members on practical penetration testing techniques, recon methodologies, and secure remediation practices.
- Coordinated study sessions, workshops, and capture-the-flag (CTF) style exercises to raise the technical proficiency of members.

**Participant** – Aspire Institute *Apr 2025 – Aug 2025 | Remote*

- Selected to participate in the prestigious global Aspire Leaders Program, completing 40+ hours of leadership development and professional
- skill-building. Gained enhanced critical thinking, communication, and problem-solving abilities through interactive global modules.
- Engaged in social-impact focused learning activities and collaborated with an international cohort of emerging leaders.

**Cybersecurity Internee** – Nuexus Technologies *Oct 2025 – Present | Remote*

- Participating in structured red team and blue team training exercises to simulate adversary behavior and defensive response.
- Gained practical experience in Linux and Windows privilege escalation techniques and mitigation strategies.
- Designed and developed security tooling projects including a custom Port Scanner to improve network discovery and assessment workflows.
- Assisted in threat emulation, post-exploitation analysis, and collaborative remediation with engineering teams.
- Documenting findings and contributing to improvement plans for secure configuration and detection coverage.

**Cybersecurity Internee** – DevelopersHub *Mar 2025 – May 2025 | Remote*

- Strengthened application security by transforming the OWASP Juice Shop from a vulnerable state to a secure environment, achieving a 95% reduction in vulnerabilities.
- Conducted hands-on exploitation and remediation of common vulnerabilities, including SQL Injection, Cross-Site Scripting (XSS), and weak authentication mechanisms.
- Implemented Intrusion Detection Systems (IDS) and API security hardening to enhance backend protection.
- Designed and deployed a Zero Trust security architecture and integrated a Web Application Firewall (WAF) for proactive threat mitigation.

**CTF Player** – TryHackMe *Apr 2024 | Remote*

- Solved a wide range of CTF challenges across web application hacking, network exploitation, cryptography, and forensics, developing a comprehensive cybersecurity skill set.
- Led team-based CTF exercises with The Eagnibals, coordinating strategies and guiding team members to successfully solve complex labs.
- Developed and utilized custom scripts and modern tools to automate tasks and enhance efficiency during penetration testing and red team exercises.
- Built a solid foundation in multiple cybersecurity domains with a specialization in Red Teaming and Penetration Testing through continuous hands-on practice and challenge-solving.

## EDUCATION

**University of AJ&K King Abdullah Campus** – Chattar Klass AJK *Nov 2027*
*Bachelor in Computer Science*

**Govt. Model Science College Muzaffarabad** – Muzaffarabad *Jul 2022*
*Intermediate*

**Read Foundation Science College | Muzaffarabad**
**U.S. Embassy English Access Microscholarship Program** *2018*
Completed a two-year initiative delivering 360+ hours of instruction in foundational English language, leadership development, critical thinking, cross-cultural understanding, and U.S. democratic values. This program equipped talented youth from disadvantaged communities with tools for better educational and professional opportunities.

## Volunteering & Leadership

**Information Security Lab Assistant** – University Of AJK King Abdullah Campus
*Nov 2025 – Present | CS & IT Department UAJK*

- Conduct practical Linux administration lab sessions covering file and directory management, package management, process management, permission settings, and network management for university students.
- Provide hands-on support and troubleshooting during lab sessions, resolving technical issues to ensure smooth learning experiences.
- Assist students in understanding key information security concepts including hashing, encryption, decryption, and brute forcing through practical demonstrations and exercises.
- Foster a collaborative learning environment by mentoring students and addressing individual challenges in real-time.

**Lincoln Corner Muzaffarabad** *Speaker/Participant Pakistan*

- Delivered 3 interactive roundtable sessions at Lincoln Corner Muzaffarabad, presenting on Cyber Diplomacy, Cybersecurity for Startups, and protection against modern hacking threats to audiences of students and professors from multiple departments.
- Collaborated with Lincoln Corner FOCs to organize and coordinate sessions, designing engaging presentations and facilitating interactive Q&A discussions that made complex cybersecurity concepts accessible to diverse audiences.
- Used real-world practical examples and relatable case studies to demonstrate cybersecurity threats and mitigation strategies, resulting in multiple students approaching me after sessions for continued mentorship and learning opportunities.

## CERTIFICATIONS

**Certified Cybersecurity Educator Professional (CCEP)** – Red Team Leaders *Nov 2025*
**Foundations of Cybersecurity** – Google *Apr 2026*

**Certified Ethical Hacker (CEH)** – EC-Council *Mar 2025*

**Huawei Tech Essentials -** Huawei *Dec 2025*

**Aspire Leadership Program** – Aspire Institute Havard *Aug 2025*

**Certified SME Cyber Security Officer(CSCSO)** – EU CyberAcademy *Dec 2025*

**Certified Red Team Operations Management Certificate** *Dec 2025*

**Introduction To Networking** – Cisco *Dec 2025*

**Python Essentials** – Cisco *May 2025*

**AI Machine Learning Deep Learning** – Corvit Networks *Oct 2024*

## Projects

### Web Application Scanner-WebHawk *Oct 2025*

- WebHawk — a Python CLI that discovers domain endpoints, runs safe automated checks for SQLi, XSS, and open redirects, and exports JSON/HTML reports.

### Keylogger *Nov 2025*

- Professional keystroke monitoring tool that captures typing patterns, tracks words, and generates beautiful HTML reports with timing analysis, anomaly detection, and behavioral metrics. Built for security research and typing pattern analysis.

### Ransomware *Dec 2025*

- A lightweight, fully offline **Python-based ransomware simulation** designed for learning file encryption, decryption, key management, and basic ransomware behavior using **Fernet** from the cryptography library.

### Scanibal *Oct 2025*

- Scanibal discovers open ports and fingerprints running services to reveal their software and version details. Built for efficient reconnaissance, it gives clear, actionable results that speed vulnerability assessment. Ideal for security scans, asset inventory, and routine network audits. Simple interface, precise output.
